

# HEPAP

December 3, 2020

Sean L. Jones, PhD  
Assistant Director, MPS  
National Science Foundation

# Welcome The New NSF Director

Dr. Sethuraman Panchanathan,  
15th Director of the National Science  
Foundation

# STRENGTHEN at SPEED and SCALE

**Core  
Research**

**Inclusion**

**Translation  
Innovation  
Partnerships**

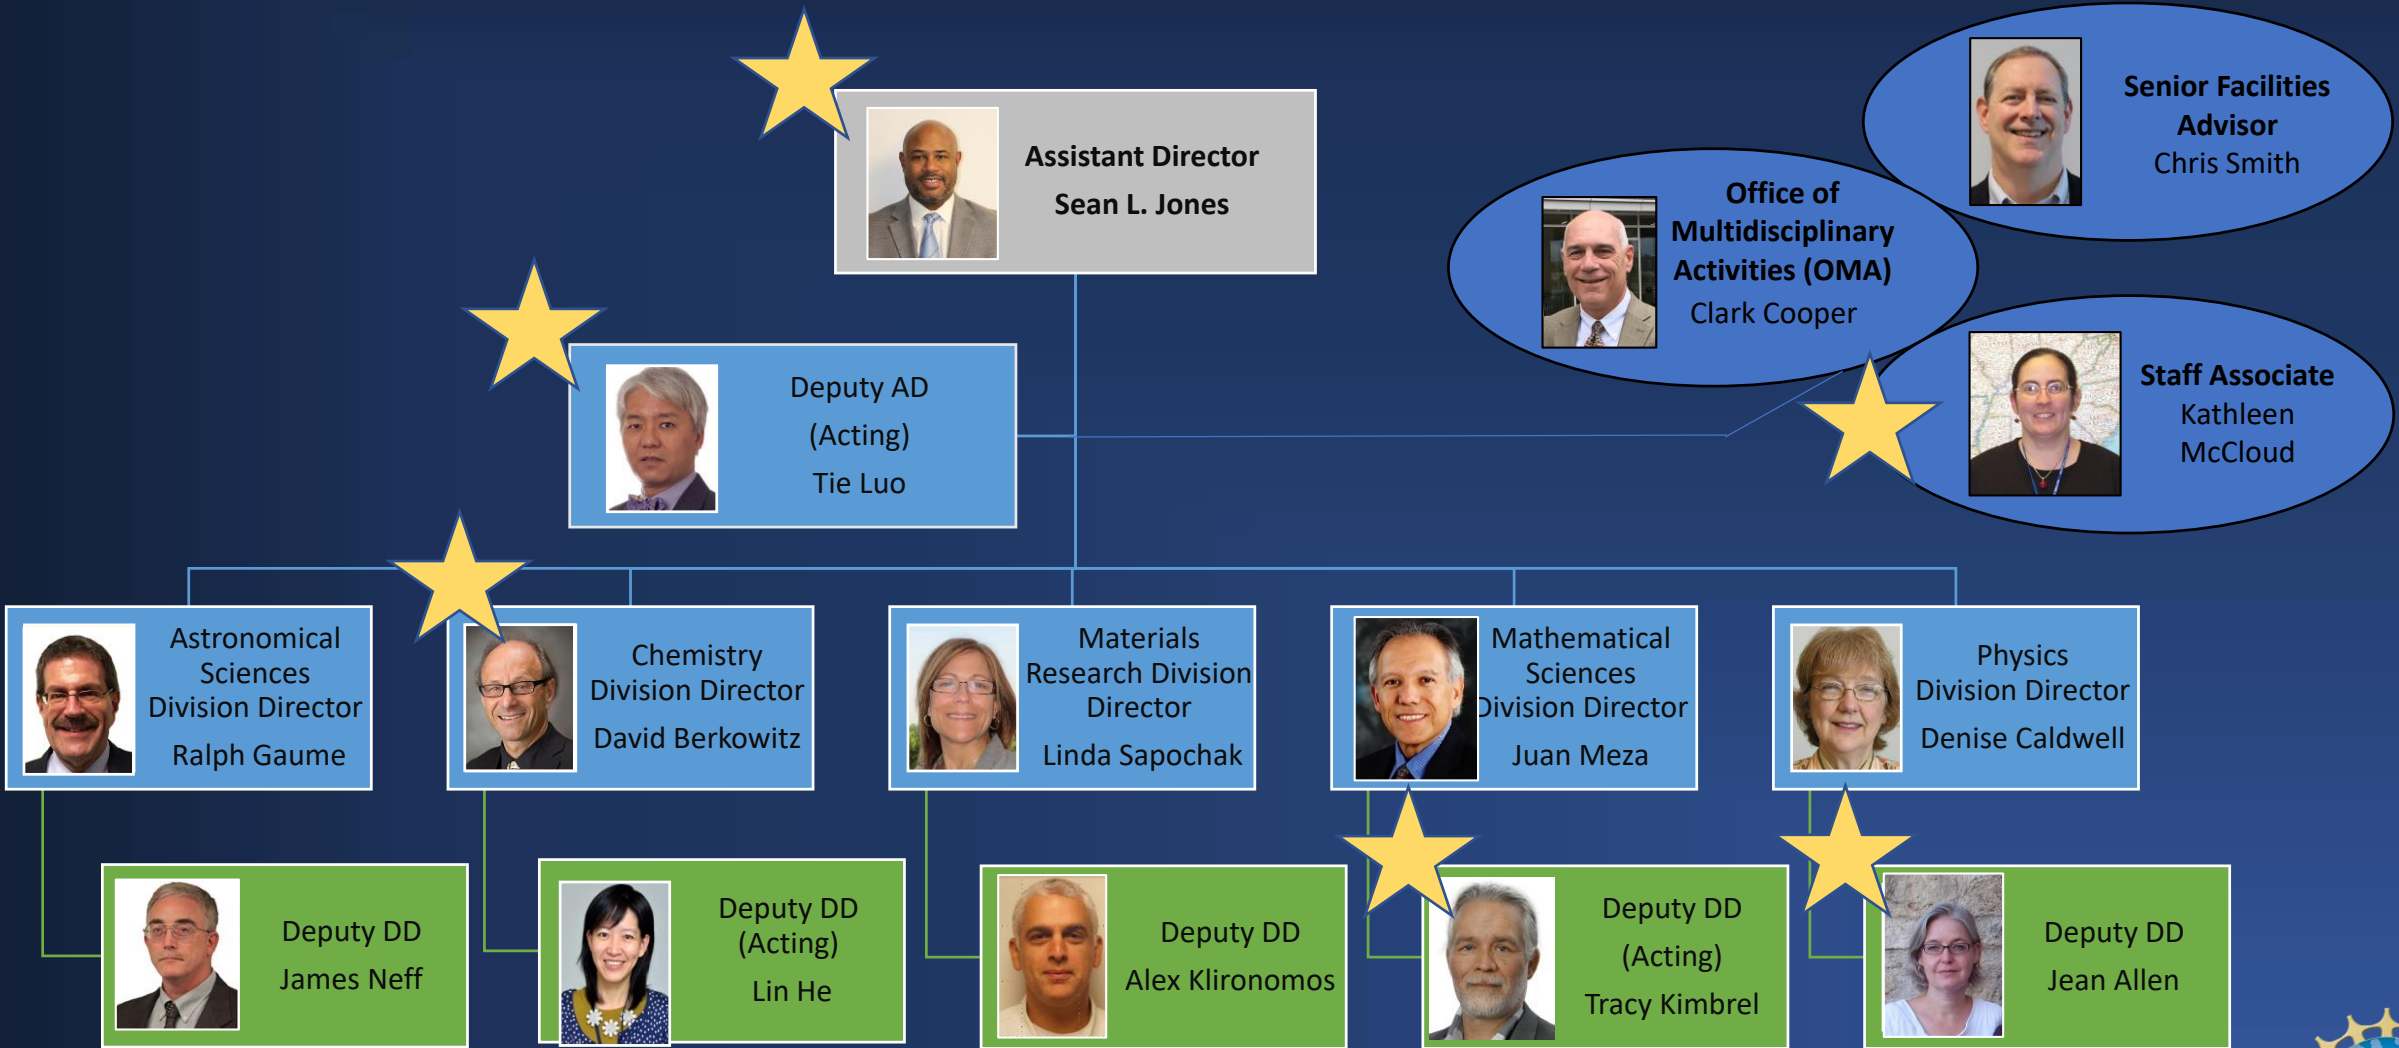

# Thank you, Anne Kinney

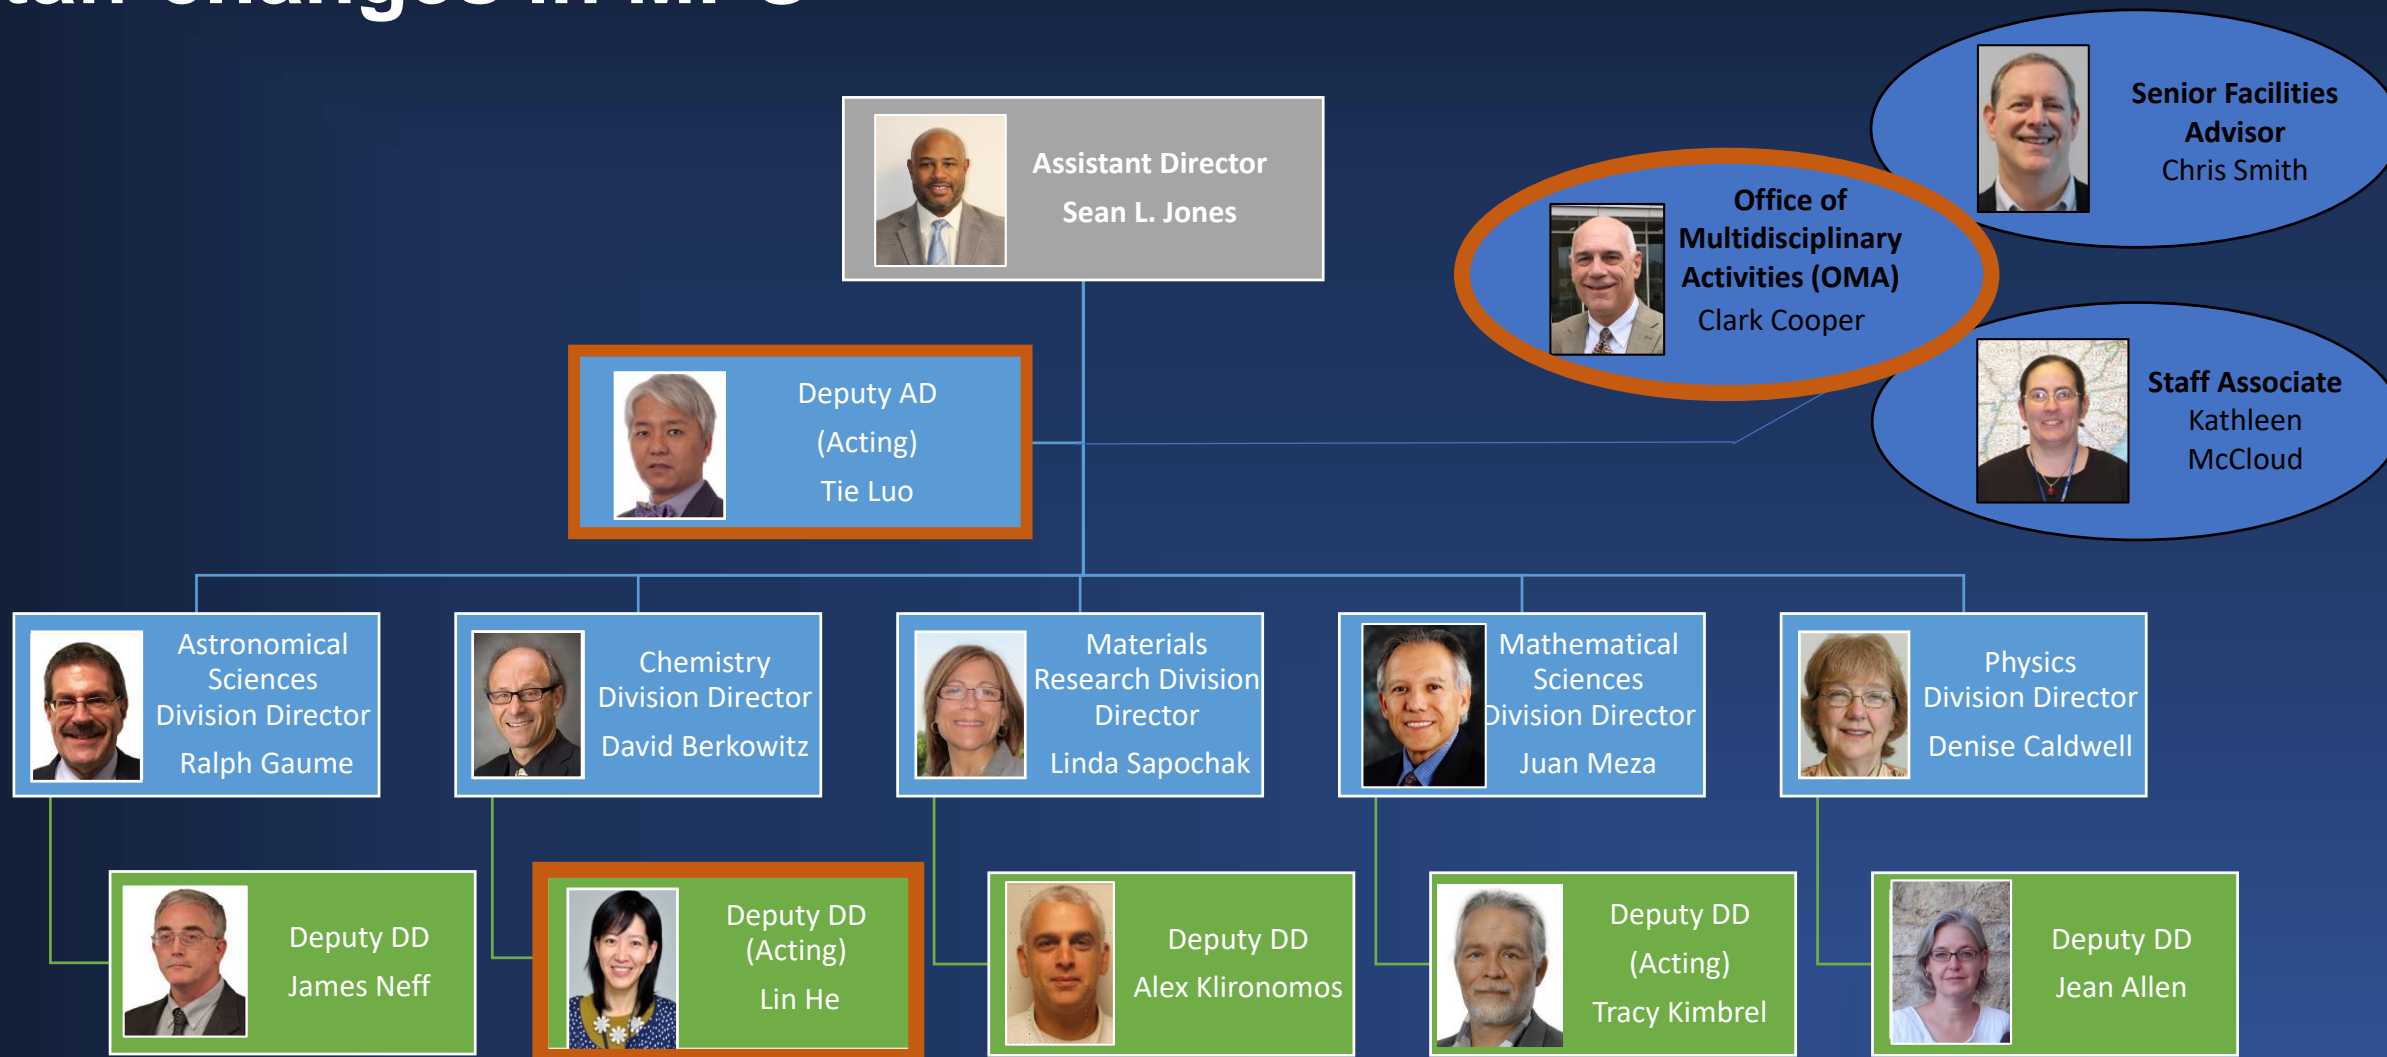

Dr. Anne L. Kinney  
Deputy Center Director, NASA Goddard  
Thank you for your service!

# Staff changes in MPS

# Staff changes in MPS

Also searching for:

- Chief Officer of Research Facilities (CORF), Office of the Director
- Assistant Director for the Engineering Directorate

# FY 2021 Budget

- Continuing Resolution until 12/11/2020
- NSF budget request = \$7.741 billion
  - House: \$8.548 billion
  - Senate: \$8.478 billion

# MPS Budget FY2019 Actuals

- Individual Investigators & Small Teams
- Centers and Institutes
- Research Infrastructure
- REU and PostDocs

# Nobel Laureates 2020

This year's Nobel Prize in Physics was awarded to Andrea Ghez, Roger Penrose, and Reinhard Genzel for work on black holes.

# NSF's 10 Big Ideas

## RESEARCH IDEAS

# MPS Awards: Big Ideas

## Mid-Scale Research Infrastructure 2 Award

### NSF Portfolio of Central Instrumentation and Infrastructure Implementation Programs

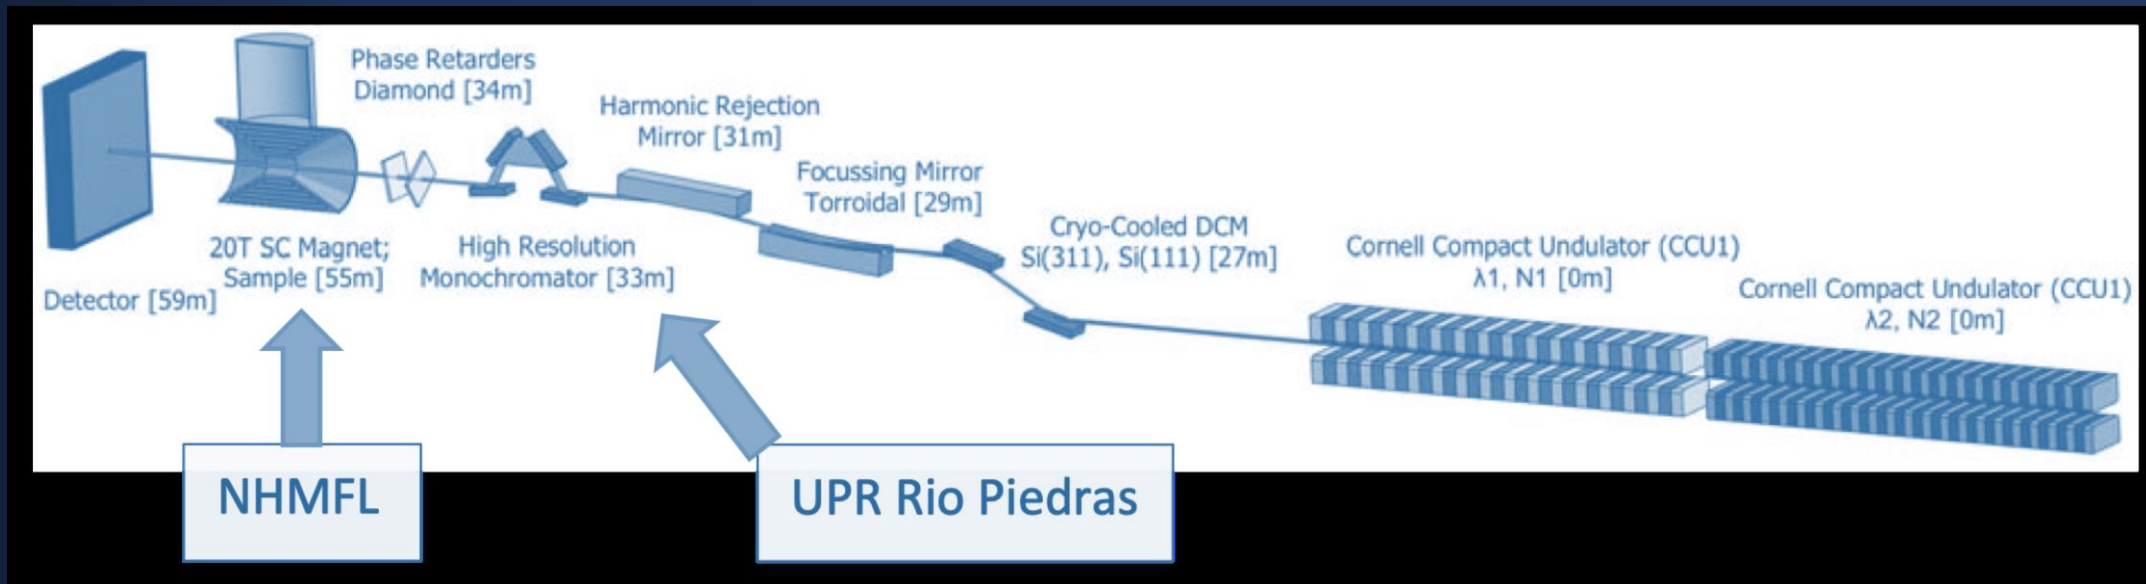

# MPS Awards: Big Ideas

## Mid-Scale Research Infrastructure –Track 2 Award

### High Magnetic Field Frontier Beamline (HMF):

CHESS will partner with NSF-funded National High Magnetic Field Laboratory and the University of Puerto Rico at Río Piedras to design and implement technology and train early career researchers from groups underrepresented in STEM

- Magnetic structures in high fields
- Tuning parameter for structural biology

- Electronic quantum matter
- Controlling processes in engineering and chemistry

PD 18-5115

## Program Description: **Windows on the Universe (WoU):** The Era of Multi-Messenger Astrophysics

- Proposals submitted to participating programs in MPS/AST, MPS/PHY and GEO/OPP.
- Proposals funded through “Big Idea” allocation as well as existing programs.
- Criteria: any area of research supported through the participating divisions that address at least one of the following:
  - *Coordination:* Hardware, software, or other infrastructure to coordinate observations involving more than one messenger.
  - *Observations:* Observations of astrophysical objects or phenomena that are potentially sources of more than one messenger, including the use of existing observatories, experiments, and data archives, as well as the development and construction of new capabilities for advancing multi-messenger astrophysics.
  - *Interpretation:* Theory, simulations and other activities to understand or interpret observations of astrophysical objects that are sources of more than one messenger.

# Industries of the Future

*“These industries promise to fuel American prosperity, improve quality of life and national security, and create high-paying jobs for American workers.”*

## Quantum Information Science

Agency Steward for QIS

- National Quantum Initiative (NQI) aligned investments
- Quantum sensors and simulators, Quantum interconnects, Quantum computing
- Diverse quantum-literate workforce
- NSF 19-55

## Artificial Intelligence

AI Institutes

Focus areas: Machine Learning, Deep Learning, Molecular Synthesis and Manufacturing

- 3 AI Institute (CHE and PHY, 1 co-fund with DMS-CISE)
- NSF-Simons collaboration
- NSF 20-604

## Advanced Wireless/5G

Steward for Spectrum Innovation Initiative

- National Radio Dynamic Zones
- Collaborative Institutes
- Workforce Development
- NSF 20-557
- 17 Planning Grants awarded
- 1 National Center to be funded in FY21

## Biotechnology

Contributions to URoL programs in synthetic biology, epigenetics, and microbiome research

- 4 MPS programs that are bio-focused (CHE, DMR, DMS and PHY)

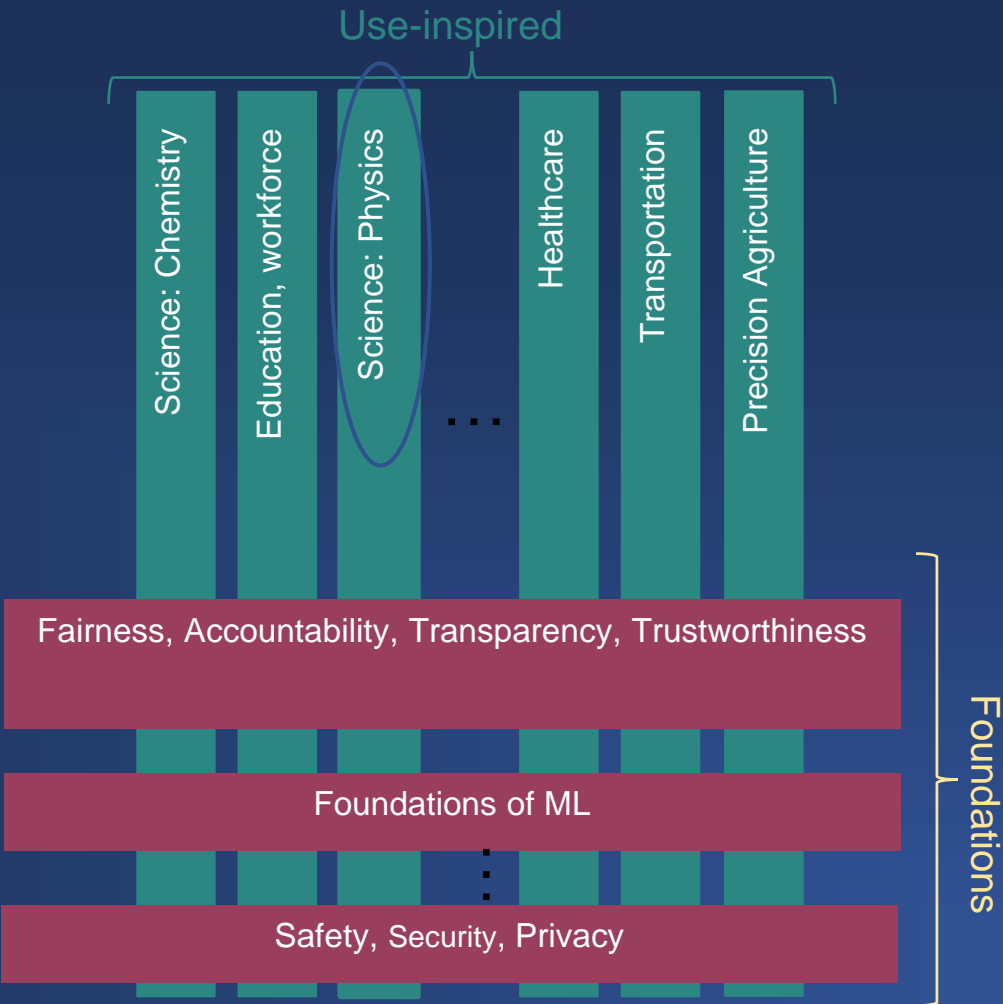

## Advanced Manufacturing

New methods, processes, analyses, tools and equipment for manufacturing products, supply chain components and materials

- DMREF (Materials Genome Initiative)

# National AI Research Institutes

- **National nexus points** for universities, federal agencies, industry and nonprofits to **advance AI research and education**
- In FY 2020:
  - *Planning grants* for future Institutes
  - Launching up to six multidisciplinary, multi-institutional research *Institutes*
- Investment: ~\$200M over six years, beginning in FY 2020

# The NSF AI Institute for Artificial Intelligence and Fundamental Interactions (IAIFI)

“eye-phi”

*Advance physics knowledge — from the smallest building blocks of nature to the largest structures in the universe — and galvanize AI research innovation*

Physics  
Theory

Physics  
Experiment

Build strong multidisciplinary collaborations  
Advocacy for shared solutions across subfields  
Training, education & outreach at Physics/AI intersection  
Cultivate early-career talent (e.g. IAIFI Fellows)  
Foster connections to physics facilities and industry

AI Foundations

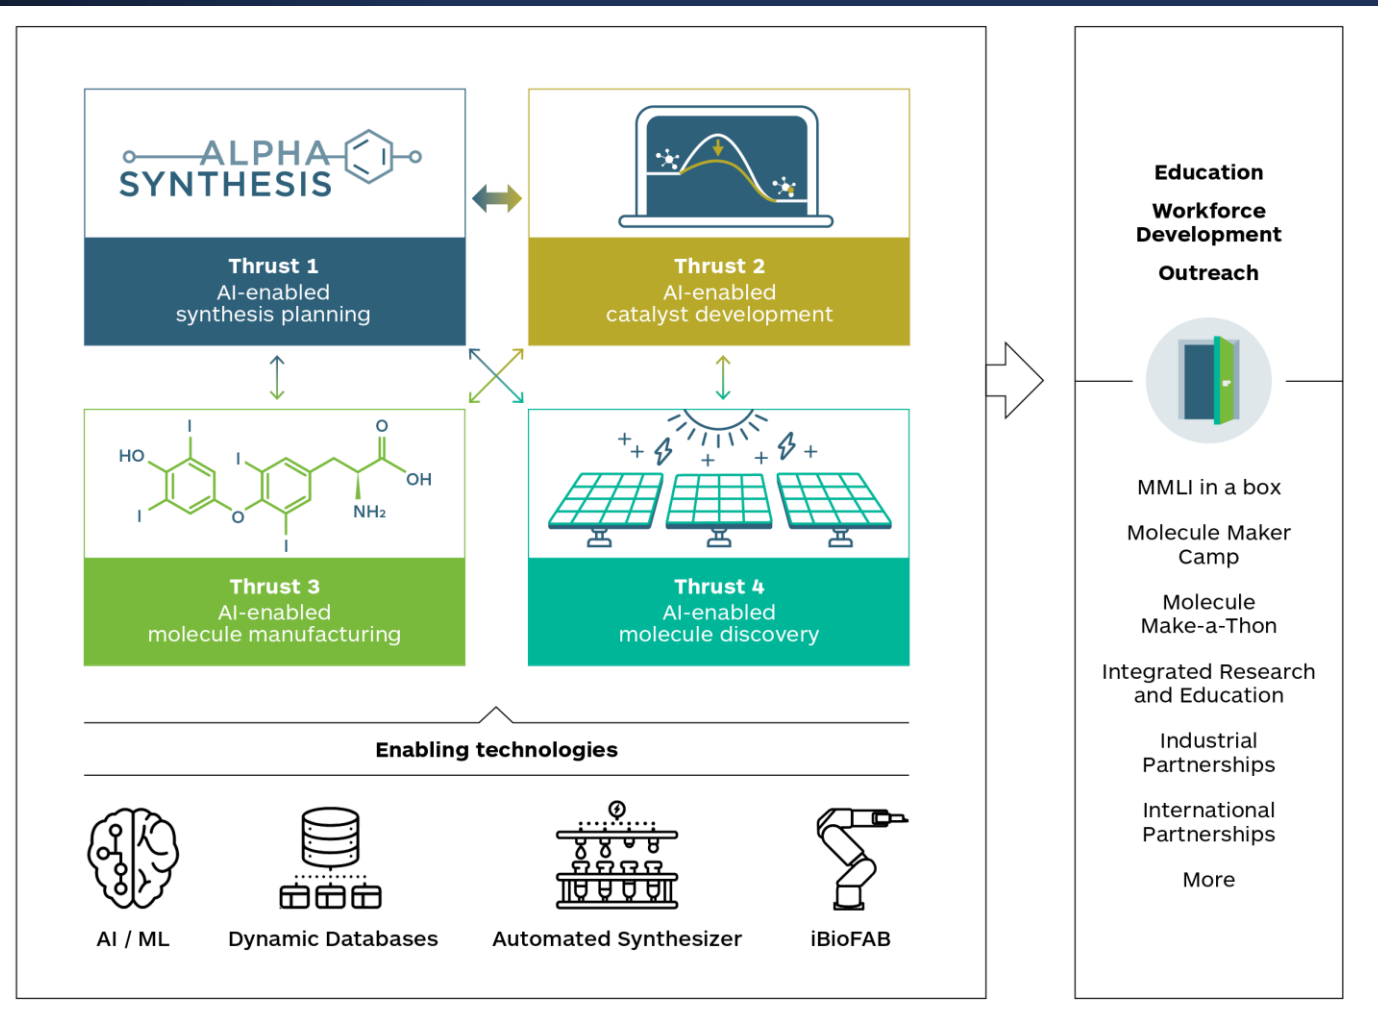

See Jesse Thaler's IAIFI talk tomorrow

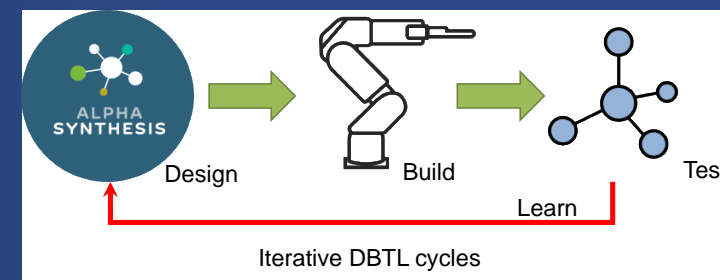

# NSF AI Institute for Molecular Discovery, Synthetic Strategy and Manufacturing (NSF Molecule Maker Lab Institute, MMLI)

PI: Huimin Zhao, Award No.: 2019897

- Discover a wide range of molecular functions
- Harness the power of data to advance the science of molecular synthesis
- Inspire future workforce to participate in the process of molecular innovation
- It is jointly supported by Division of Chemistry, Directorate of Computer and Information Science and Engineering, and Directorate of Engineering.
