

Robert W. Atcher, PhD, MBA is a staff member at Los Alamos National Laboratory. He is also a Los Alamos National Laboratory/University of New Mexico Professor of Pharmacy. He is a past president of the Society of Nuclear Medicine and serves as the non-voting member of NSAC representing the SNM. His research interests include isotope production, separations chemistry and radionuclide generator design, radiopharmaceuticals with special emphasis on the diagnosis and treatment of cancer, and the clinical development of radiopharmaceuticals. He has published 90 papers in peer reviewed publications, holds six patents, presented 70 papers at scientific meetings and 150 invited talks. He is a member of several scientific societies and has held numerous offices and committee assignments in them. He has served as a consultant and advisor to academic, non-profit and commercial entities. Most recently, he served on the NSAC isotope subcommittee that published two studies on the isotope production program. He holds a B.A. from Washington University in chemistry, a PhD in nuclear chemistry from the University of Rochester and an MBA from the University of New Mexico. His postdoctoral appointment was in the Joint Program in Nuclear Medicine at Harvard Medical School.
