INTEGRATED SUPPORT CENTER—CHICAGO OFFICE**

**NATIONAL ENVIRONMENTAL POLICY ACT (NEPA)  
ENVIRONMENTAL EVALUATION NOTIFICATION FORM**

**To be completed by "Applicant," i.e., organization with responsibilities for a "Federal action" involving application to DOE for a permit, license, exemption or allocation, or other similar actions. For assistance with this Form, refer to "Instructions for Preparing ISC-CH F-560, Environmental Evaluation Notification Form."**

Solicitation/Award No. (if applicable): DE-SC0021765

Organization Name: H3D, Inc.

Proposed Action Title: Ruggedized, High-Resolution CZT Spectrometer for Operation in Inert Hot Cells

Total DOE Funding/Total Funding: 1,350,000\$

**I. Project Description: (Use explanation pages if additional space is required)**

**A. Proposed Project/Action (if applicable, delineate Federally funded/Non-Federally funded portions)**

A weak 0.1uCi Ba133 source was purchased under the Phase II SBIR. The Ba133 source, which emits a unique gamma-ray cascade, will be used to measure the coincidence photons. This cheap source, <1k, will be sandwiched between two M400 detectors to measure this cascade. Due to the weak nature of the source its use will be limited to this DOE SBIR.

**B. Would the project proceed without Federal funding?**

Yes  No

**If "yes," use explanation page.**

**II. Description of Affected Environment: (Use explanation pages if additional space is required)**

This source will be used indoors only. It is an NRC exempt radiation source. The dose rate is so low that it will not impact any workers or members of the public.

Optional Additional Narrative: (add additional detail to description to Sections I and II or explanations to responses in Sections III and IV.

Explanation of whether this work would continue without funding: The SBIR, which funds far more work than the coincidence measurements, enables a large variety of work. The vast majority of these efforts would not occur without federal funding. In particular, coincidence measurements would not occur without federal funding. We would not purchase this source for such a niche measurement otherwise.
