ENVIRONMENTAL EVALUATION NOTIFICATION FORM**

***To be completed by "Applicant," i.e., organization with responsibilities for a "Federal action" involving application to DOE for a permit, license, exemption or allocation, or other similar actions. For assistance with this Form, refer to "Instructions for Preparing ISC-CH F-560, Environmental Evaluation Notification Form."***

Solicitation/Award No. (if applicable): DE-SC0023311

Organization Name: Clemson University

Proposed Action Title: How do wildfire severity and post-fire precipitation influence fate and transport of pyrogenic organic carbon and nitrogen in terrestrial-aquatic interfaces?

Total DOE Funding/Total Funding: \$645,719.00

**I. Project Description: *(Use explanation pages if additional space is required)***

**A. Proposed Project/Action (if applicable, delineate Federally funded/Non-Federally funded portions)**

This project is a 3-year collaborative research project between USFS Savannah River Site, Clemson University, and Oak Ridge National Lab to develop a mechanistic understanding of how wildfire severity and post-fire precipitation affect the hydro-biogeochemical processes of pyrogenic organic matter (PyOM), including pyrogenic organic carbon (PyOC) and nitrogen (PyON), across terrestrial-aquatic interfaces. The project will involve prescribed burning of 10-12 small, first order watersheds (< 10 ac) after additional fuel amendments have been added. These burns will occur within larger scheduled prescribed burns in collaboration with and under the supervision of USFS Savannah River Fire Team and USFS Savannah River Research Team.

B. Would the project proceed without Federal funding? Yes  No

***If "yes," use explanation page.***

**II. Description of Affected Environment: *(Use explanation pages if additional space is required)***

Research will be conducted on the Savannah River Site (SRS), a DOE owned and managed facility in South Carolina. Core areas of SRS are managed by DOE and DOE-partners, while the 175,000 acre forest area is managed on behalf of DOE by the USFS for the purpose of resource management, research, and preservation. The specific areas for this research within the greater SRS area are managed upland pine forests with prescribed fire management plans.

Optional Additional Narrative: (add additional detail to description to Sections I and II or explanations to responses in Sections 3 and 4.

Section IV, question A.1: According to US Forest Srv -SR Sr. Natural Resource Program Manager, Red-cockaded Woodpecker (endangered) habitat is anticipated to be used for the study. However, the research will not be within any RCW clusters. The species benefits from fire and research will occur within existing prescribed fire management activity for the species. Coordination with the U.S. Forest Service (USFS) researcher on-site will occur prior to conducting activities in those areas of the site.

Section IV, question C.42: The local USDA SRS Forest Service office working with Clemson still has to complete their own NEPA process per SRS site procedures. This SRS Forest Service process must be completed prior to the commencement of work. This DOE form should be attached to the Forest Service documentation.
